CONTACT INFORMATION      Operations Research and Information Engineering      andrew@cornell.edu  
Cornell University      <https://people.orie.cornell.edu/andrew>  
235 Rhodes Hall, 136 Hoy Road, Ithaca, NY, 14853, USA

RESEARCH INTERESTS      I develop flexible, interpretable, and scalable machine learning models, especially for kernel learning, deep learning, and Gaussian processes. I am particularly excited about probabilistic approaches. My work is applied to time series, vision, NLP, spatial statistics, public policy, medicine, and physics.

CURRENT POSITION      **Assistant Professor, Cornell University**      **August 2016 –**  
*Operations Research and Information Engineering*  
*Field member of ORIE, Computer Science, Statistics, and Applied Mathematics*

ACADEMIC BACKGROUND      **Research Fellow, Carnegie Mellon University**      **March 2014 – August 2016**  
*Machine Learning Department, School of Computer Science*  
• **Mentors:** Eric P. Xing and Alexander J. Smola

**PhD, Trinity College, University of Cambridge**      **October 2009 – March 2014**  
*Machine Learning, Department of Engineering*  
• **Supervisor:** Zoubin Ghahramani  
• **Thesis:** *Covariance Kernels for Fast Automatic Pattern Discovery and Extrapolation with Gaussian Processes*. January 2014.

**BSc (Hons), University of British Columbia**      **May 2008**  
*Mathematics and Physics*  
• A+ Graduating Average, Highest Ranking Honours Physics Thesis.  
• **Thesis:** *Position and Energy Reconstruction from Scintillation Light in a Liquid Xenon Gamma Ray Detector designed for PET*.

## AWARDS

- Outstanding PhD Dissertation (£10,000), G-Research      2014
- Outstanding Reviewer Award, Neural Information Processing Systems (NIPS)      2013
- Best Student Paper Award, Uncertainty in Artificial Intelligence (UAI)      2011
- Schiff Foundation Studentship      2009-2014
- NSERC Postgraduate Scholarship (Doctoral) (PGS-D)      2010-2013
- Trinity College Overseas Bursary      2009-2013
- Cambridge Commonwealth Trust      2009-2013
- NSERC Canadian Graduate Scholarship (Masters) (CGS-M) (Declined)      2009
- John Collison Memorial Scholarship in Mathematics      2007-2008
- Dean's Honour List, Science Scholar, Undergraduate Program Scholarship, TRIUMF Research Scholarship, NSERC Undergraduate Research Scholarship (USRA)

## SELECTED TALKS

- SIAM ALA (Applied Linear Algebra) Hong Kong, May 2018
- BIRS Workshop (Stats & ML) Banff, Canada, January 2018
- UCL Gatsby London, UK, December 2017
- University of Cambridge Cambridge, UK, December 2017
- Microsoft Research Cambridge, UK, December 2017
- CMStatistics London, UK, December 2017
- AI Seminar, Cornell Ithaca, NY, October 2017
- Statistics Seminar, Cornell Ithaca, NY, September 2017
- Linköping University Linköping, Sweden, April 2017
- UCLA Los Angeles, USA, January 2017
- University of British Columbia Vancouver, Canada, March 2016
- University of Edinburgh Edinburgh, UK, March 2016
- University of Southern California Los Angeles, USA, March 2016
- University of California, Irvine Irvine, USA, March 2016
- UCLA Los Angeles, USA, March 2016
- University of Massachusetts Amherst, USA, March 2016
- Cornell University Ithaca, USA, March 2016
- University of Toronto Toronto, Canada, February 2016
- Dartmouth College Hanover, USA, February 2016
- EPFL Lausanne, Switzerland, February 2016
- University of Waterloo Waterloo, Canada, January 2016
- University of Cambridge Cambridge, UK, August 2015
- International Conference on Machine Learning Lille, France, July 2015
- New York University NYC, USA, June 2015
- Neural Information Processing Systems Workshop Montreal, Canada, December 2014
- Oxford University Oxford, UK, November 2014
- University College London London, UK, November 2014
- Machine Learning Summer School (MLSS) Pittsburgh, USA, July 2014

- International Conference on Machine Learning Atlanta, USA, June 2013
- Xerox Research Seminar Grenoble, France, November 2012
- ECML Nectar Track Bristol, UK, September 2012
- Microsoft Research Cambridge, UK, September 2012
- International Conference on Machine Learning Edinburgh, UK, June 2012
- University of California, Berkeley Berkeley, USA, May 2012
- Harvard University Cambridge, USA, April 2012
- International Joint Conference on Artificial Intelligence Barcelona, Spain, July 2011
- Uncertainty in Artificial Intelligence Barcelona, Spain, July 2011
- Bayesian Econometrics Workshop Rimini, Italy, June 2011
- ETH Zurich, Switzerland, February 2011
- Latent Gaussian Models Workshop Zurich, Switzerland, February 2011
- University College London London, UK, October 2010

REVIEWING AND  
SERVICE

Biometrika, Neural Computation, Neurocomputing, Journal of Machine Learning Research (JMLR), Electronic Journal of Statistics, Journal of Artificial Intelligence Research (JAIR), IEEE Transactions on Neural Networks, IEEE Transactions on Pattern Analysis and Machine Intelligence, Advances in Neural Information Processing Systems (NIPS), International Conference on Machine Learning (ICML), Artificial Intelligence and Statistics (AISTATS), Uncertainty in Artificial Intelligence (UAI), International Conference on Learning Representations (ICLR), International Joint Conference on Artificial Intelligence (IJCAI).

Area Chair/SPC: AAAI 2018, AISTATS 2018, UAI 2018.

Designed a Eureka course (10 sessions) introducing machine learning to high school students.

#### Symposia/Workshops:

- Co-organiser of NIPS 2017 symposium  
*Interpretable Machine Learning.*
- Co-organiser of the NIPS 2017 workshop  
*Bayesian Deep Learning.*
- Co-organiser of NIPS 2016 workshop:  
*Interpretable Machine Learning for Complex Systems.*  
arXiv index: <https://arxiv.org/abs/1611.09139>
- Co-organiser of the NIPS 2015 workshop:  
*Nonparametric Methods for Large Scale Representation Learning.*
- Co-organiser of the ICML 2015 workshop:  
*Large Scale Kernel Learning: Challenges and New Opportunities.*
- Co-organiser of the NIPS 2014 workshop:  
*Modern Nonparametrics 3: Automating the Learning Pipeline.*

TEACHING

- ORIE 6741: *Bayesian Machine Learning*. 90 graduate students enrolled. Fall 2017.
- Designed the new undergraduate course ORIE 4742: *Information Theory, Probabilistic Modeling, and Deep Learning* at Cornell University. Spring 2017.  
Calendar description: <https://classes.cornell.edu/browse/roster/SP17/class/ORIE/4742>
- Designed the new PhD course ORIE 6741: *Bayesian Machine Learning* at Cornell University. 43 graduate students enrolled.  
Course website: <https://people.orie.cornell.edu/andrew/orie6741>. Fall 2016.
- Lecturer on Markov chain Monte Carlo, Model Selection, and Advanced Gaussian Processes in Probabilistic Graphical Models (10-708), CMU.
- Lecturer on Kernel Methods at the 2014 Machine Learning Summer School.

GRANTS NSF IIS-1563887. *Scaling Machine Learning for Automating Scientific Discovery in Astrophysics*. August 2016 – July 2019. Co-PI. **\$1,100,000**.

VIDEO LECTURES 2016: Scalable Gaussian processes for scientific discovery  
(CLICKABLE 2015: Kernel interpolation for scalable structured Gaussian processes  
LINKS) 2014: Kernel methods for large scale representation learning  
2013: Kernels for automatic pattern discovery and extrapolation  
2012: Gaussian process regression networks  
2010: Copula processes

EMPLOYMENT **Microsoft Research**, Cambridge, UK **07/2012 – 09/2012**  
*Research Intern, Supervisor: Sebastian Nowozin*

- I developed Bayesian inference techniques, and new Bayesian nonparametric models, for NMR spectroscopy. These new machine learning techniques can be used to make predictions about chemical concentrations and the progress of chemical reactions, and are markedly different from conventional NMR spectroscopy techniques.

**TRIUMF**, Vancouver, Canada **09/2007 – 08/2008**  
*Researcher, Supervisor: Douglas Bryman*

- Positron Emission Tomography (PET) is used to visualise functional activity, as opposed to anatomical structure; for example, it can be used to trace thought processes. At TRIUMF, the world's largest cyclotron laboratory, I independently devised image reconstruction algorithms necessary for the operation of a groundbreaking new PET device.

**University of British Columbia**, Vancouver, Canada **05/2007 – 08/2007**  
*Teaching Assistant, Mathematics Department*

- I was the teaching assistant for a third year class in partial differential equations. I graded approximately 70 assignments weekly, and gave tutorial lectures twice weekly, where I derived theorems and explained concepts. I also tutored individuals and groups, and helped students with test preparation.

**University of British Columbia**, Vancouver, Canada **05/2006 – 08/2006**  
*Researcher, Physics Department, Supervisor: Matthew Choptuik*

- I worked on developing a scientific programming language. I wrote a grammar and a parser to interpret the rules of the language. The language numerically solves partial differential equations, given the equations and the boundary conditions. The language also generates C and Fortran solution templates, and animated visualizations of the solution. I used C, Fortran, Perl, Flex (Lex), Bison (Yacc), tcsh and bash. The project consisted of 182 sources written in these languages. I also worked on a code-driver, using Perl, to generate fully functioning C and Fortran programs from a small number of declarations in an input file. This work was motivated to assist in using general relativity to model physical problems.

MISC I am a classically trained pianist. I particularly like Glenn Gould's playing of Bach. I also enjoy reading about modern physics, and writing essays.
