What is GitHub

- GitHub is a code hosting platform for version control and collaboration.
- It lets you and others work together on projects from anywhere.
Create a New Repository

- Sign in GitHub.
- Create a new repository.
- Clone it to local repository (git clone).
Make a Change

- Make some change in your local repository.
- Add the changes to git (git add)
- Commit the change (git commit)
- Push it to remote (git push)
Use issues to write comment and review.
Can comment other’s issue.
